

In the Sign Up and Login window, ensure usernames and password are at least 6 characters long. If less than 6 characters are entered, display an error message, which disappears after 3 seconds.

A screenshot of a web application window titled "REGISTER". The main heading is "Enter Your SignUp Details" in a blue bar, with a "Back" button to its right. Below the heading, there are two input fields: "Enter Your Username" and "Enter Your Password". The password field has a "Show Password" checkbox below it. A yellow "Sign Up" button is at the bottom. A red error message at the bottom states: "Username and Password must be at least 6 characters long".

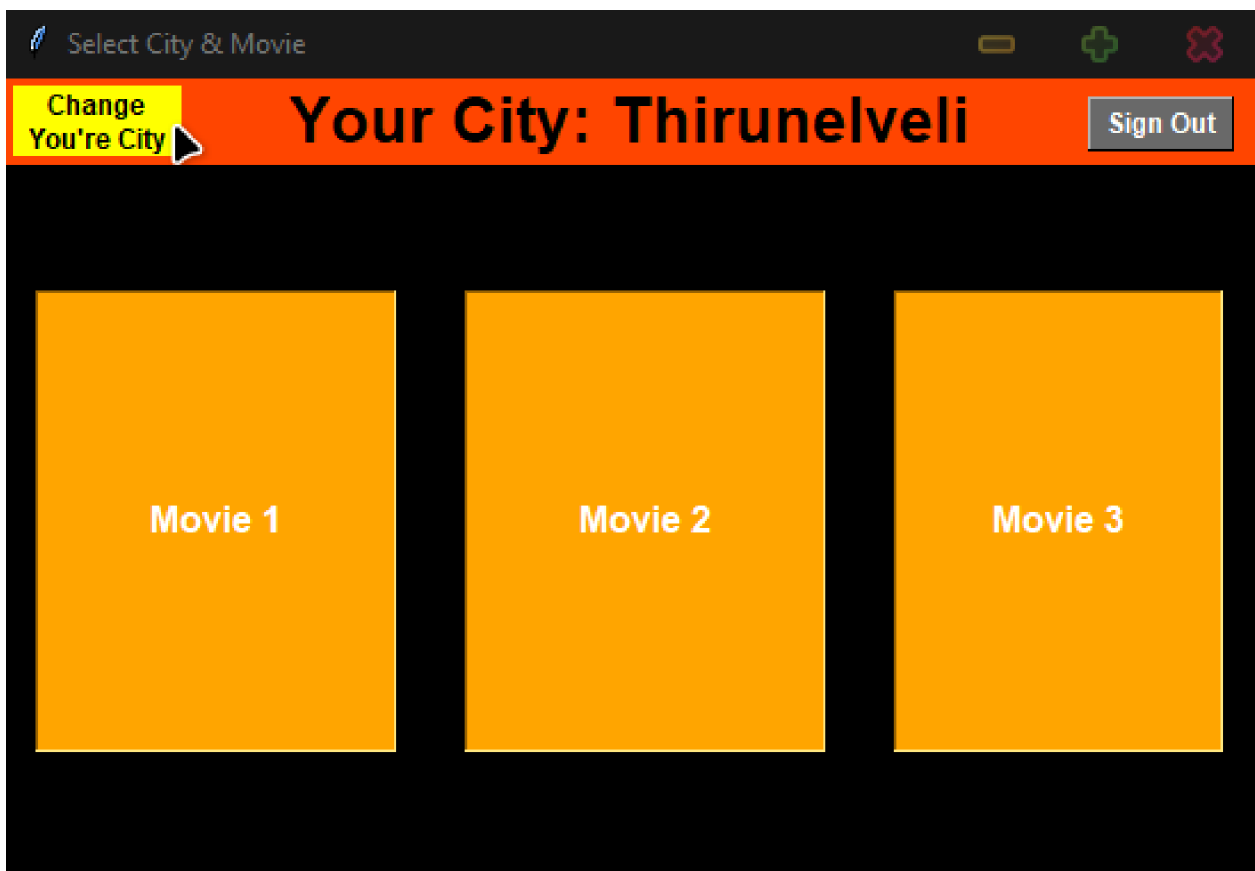

I added a "Show Password" option in the Sign Up and Login window for toggling password visibility.

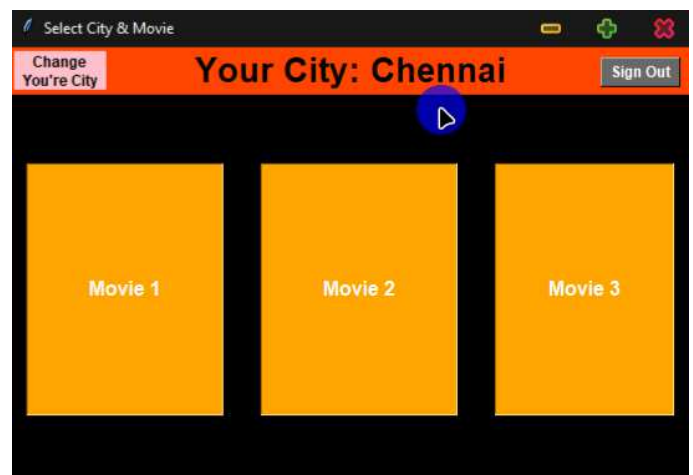

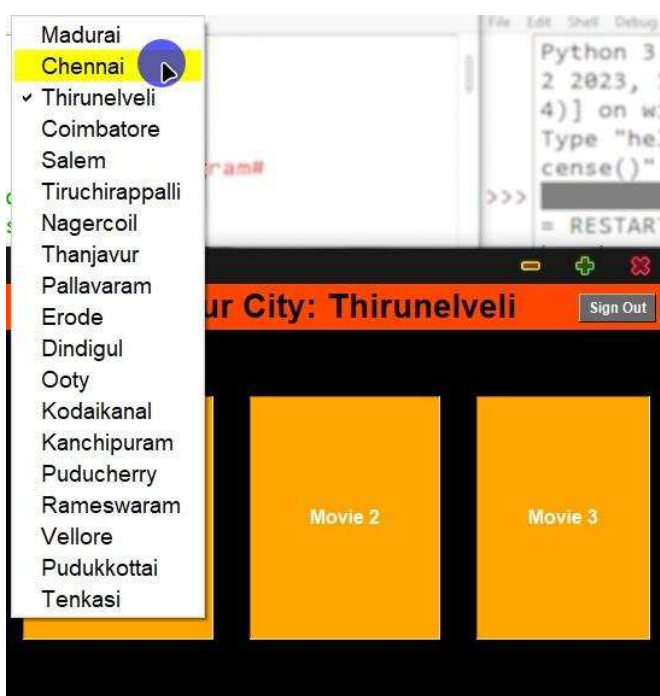

Two side-by-side screenshots of the "Enter Your SignUp Details" form. The left screenshot shows the "Show Password" checkbox unchecked, with the password field masked with asterisks. The right screenshot shows the "Show Password" checkbox checked, with the password field displaying "12345678". Both screenshots have the username field filled with "starboy".

After Signing up or logging in, it opens a window for users to choose their city and movies, And I added a Sign Out button at the top left within the label, Clicking Sign out opens the main window.

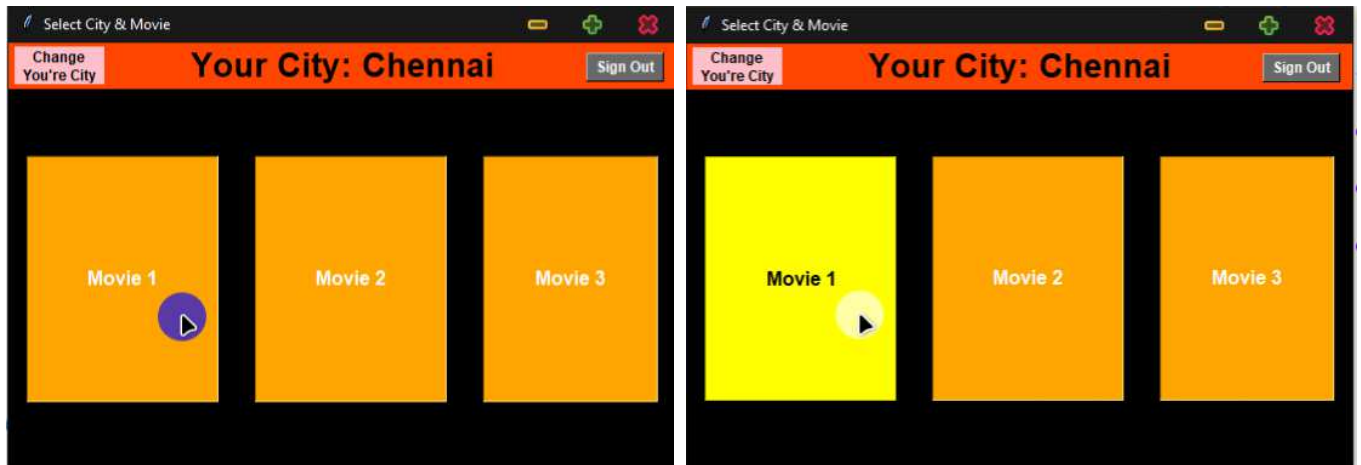

After city selection, the label switches to "Your City", and the menu button relocates to the top-left side of the label.

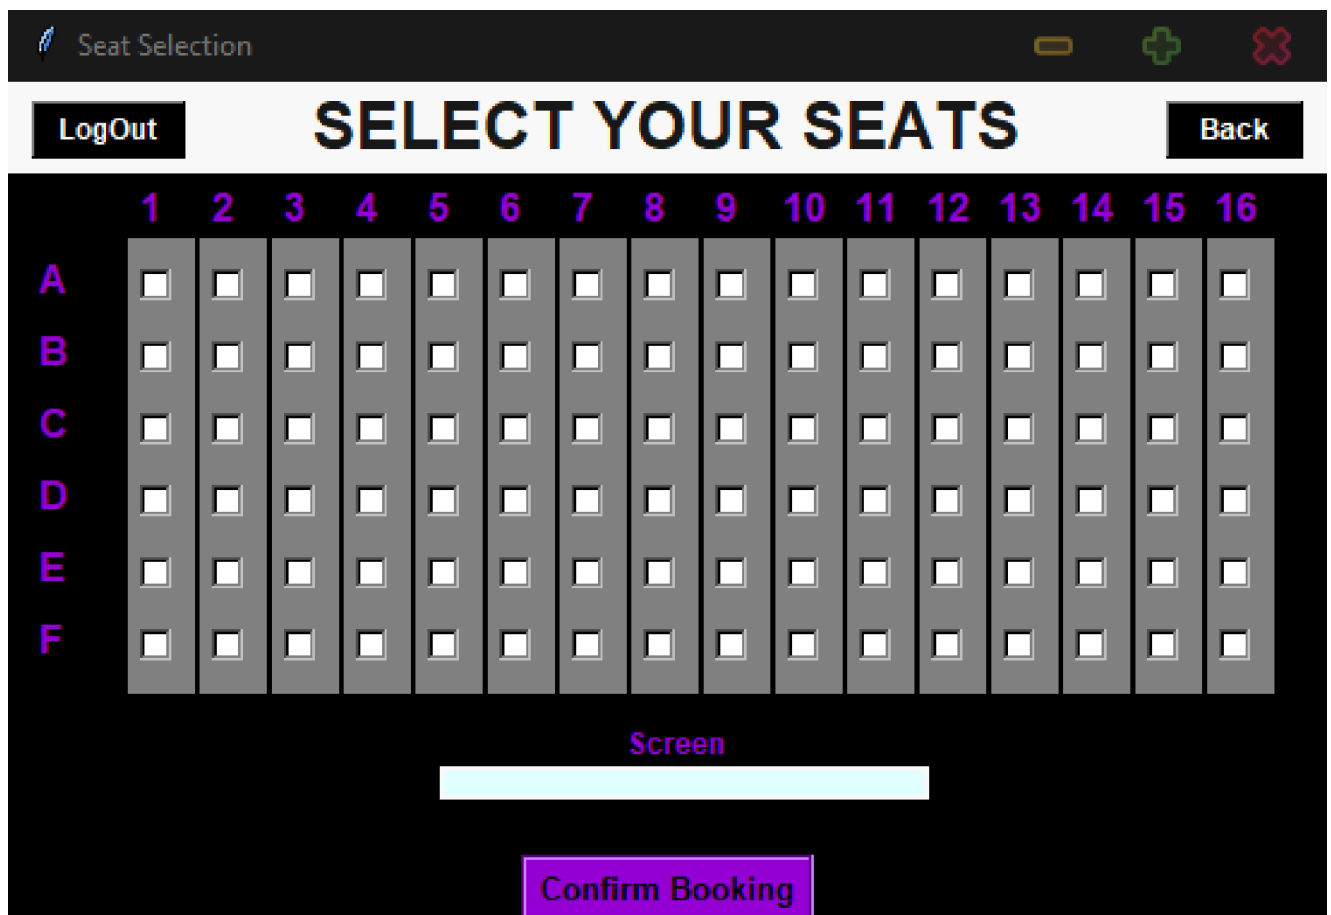

For city changes after selection,
I display the preview as shown.

Now, the user selects their preferred movie.

After selecting a movie, the seat selection window opens, and I added logout and back buttons in label.

Your Seats: C6,C7,C8,C9,  
Total Cost: 760

**In the login window, entering incorrect username and password displays an error.**

**All data, Including username, password, city, Movie name, seat name and total amount is stored in the SQL database.**

The screenshot displays the phpMyAdmin web interface. On the left sidebar, the database structure is shown with 'logindetails' selected and 'userdatas' highlighted. The main panel shows the 'Table: userdatas' view. A message at the top states: 'Current selection does not contain a unique column. Grid edit, checkbox, Edit, Copy and Delete features are not available.' Below this, a green bar indicates 'Showing rows 0 - 0 (1 total, Query took 0.0005 seconds)'. The SQL query 'SELECT \* FROM `userdatas`' is entered in the query box. Below the query box, there are options for 'Show all', 'Number of rows' (set to 25), and a 'Filter rows' search box. The 'Extra options' section is expanded, showing a table with the following data:

| username | password | city               | Moviename | seatname     | Amount |
|----------|----------|--------------------|-----------|--------------|--------|
| starboy  | 12345678 | Your City: Chennai | Movie 1   | C6,C7,C8,C9, | 760    |

Below the table, there are options for 'Show all', 'Number of rows' (set to 25), and a 'Filter rows' search box. The 'Query results operations' section includes links for 'Print', 'Copy to clipboard', 'Export', 'Display chart', and 'Create view'. At the bottom, there is a 'Bookmark this SQL query' section with a 'Label' input field and a checkbox 'Let every user access this bookmark'. The 'Console' tab at the bottom shows the executed SQL query.
